Bernanke began his career at the Stanford Graduate School of Business in 1979. In 1985 he moved to Princeton University, where he served as chair of the Economics Department from 1995 to 2002. He has twice been visiting professor at M.I.T. and once at New York University, and has taught in undergraduate, M.B.A., M.P.A., and Ph.D. programs. Sloan Research Fellow, a Hoover Institution National Fellow, a National Science Foundation Graduate Fellow, and a Research Associate of the National Bureau of Economic Research. He received his A.B. from Ohio University and his Ph.D. from Ohio State University. Croushore began his career at Pennsylvania State University in 1984. After teaching for five years, he moved to the Federal Reserve Bank of Philadelphia, where he was vice president and economist. His duties during his fourteen years at the Philadelphia Fed included heading the macroeconomics section, briefing the bank’s president and board of directors on the state of the economy and advising them about formulating monetary policy, writing articles about the economy, administering two national surveys of forecasters, and researching current issues in monetary policy. In his role at the Fed, he created the Survey of Professional Forecasters (taking over the defunct ASA/NBER survey and revitalizing it) and developed the Real-Time Data Set for Macroeconomists. Croushore returned to academia at the University of Richmond in 2003. The focus of his research in recent years has been on forecasting and how data revisions affect monetary policy, forecasting, and macroeconomic research.

Croushore's publications include articles in many leading economics journals and a textbook on money and banking. He is associate editor of several journals and visiting scholar at the Federal Reserve Bank of Philadelphia.
